

# MEC I-BAR SHRINK SYSTEM WITH HEAT GUN

**vector** contour  
quality shrink film

While a variety of Centerfold Films can be used with the machines we recommend CONTOUR Brand POE Films for the best result. These FDA Food Grade Films are available in various Sizes & Thicknesses and can be Shrink wrapped.

1 According to the micron of the film set the **control dial** (inset) between 5 and 8. Place the roll of **POE centerfold film** on the **rollers**.

2 Part it with the **separating plate** and pull a length under the **sealing arm**. Press the sealing arm down to seal the film closed.

Model Type	Seal Length	Seal Type	Power	Heat Gun
ME450SPT	450mm	1mm Cut Wire	240V/50Hz 350W	1500W
ME600IPT	600mm	1mm Cut Wire	240V/50Hz 450W	

3 Pull a length of film out and insert the **product** between the two pieces of film

4 Press the **sealing arm** firmly down and hold until the red light switches off. The sealed product should pull away easily.

5 Rotate and repeat the sealing on the open side, tearing the excess plastic away as the **sealing light** switches off.

6 Apply the **heat gun** to all sides of the product. The heat will shrink the film firmly around the product.
